Professional Summary

SOC Analyst with 1+ years of experience in **24/7 Security Operations Center (SOC) environments** specializing in monitoring, alert triage, and incident investigation. Adept at maintaining **SLA compliance** and supporting proactive threat detection and response activities. Hands-on experience with **SIEM** platforms including **QRadar**, **Splunk**, and **Microsoft Sentinel**, along with endpoint analysis using EDR tools. Skilled in log analysis, phishing and malware alert investigation, **IOC validation**, and escalating confirmed incidents in alignment with incident response playbooks and the **MITRE ATT&CK framework**.

Skills

- **Security Operations:** Alert Triage, Incident Response, IDS/IPS Analysis, Threat Detection and Hunting, Troubleshooting
- **SIEM/Logging:** QRadar, Splunk, Microsoft Sentinel, Firewalls, Proxy, System Logs (Windows / Linux), Wireshark
- **EDR/XDR:** CrowdStrike Falcon, Microsoft Defender for Endpoint, Symantec Endpoint Security (SES)
- **Email Security:** Proofpoint, Microsoft 365 Defender, Phishing Investigation, Spam Email Analysis
- **Threat Analysis:** MITRE ATT&CK, IOC/IOA Analysis, Malware Triage
- **Networking & Security:** TCP/IP, DNS, HTTP/HTTPS, CIA triad, Vulnerability Management

Work Experience

SOC Analyst

Wipro

Jan 2025 - Present

Hyderabad, India

- Monitored daily security alerts and events through SIEM platforms to identify suspicious activities, unauthorized access attempts, and potential security incidents across enterprise environments.
- Performed initial triage and investigation of alerts generated from firewalls, endpoints, Windows/Linux servers, and proxy solutions to determine severity and business impact.
- Assisted in identifying phishing emails, malicious attachments, and suspicious URLs by analyzing email headers, sender reputation, and threat intelligence indicators.
- Supported endpoint investigations using EDR solutions by reviewing process activity, user behavior, network connections, and suspicious file executions.
- Escalated validated security incidents to senior analysts and incident response teams with proper documentation, supporting evidence, and investigation findings.
- Maintained and updated incident tickets in ServiceNow while ensuring proper tracking, documentation, and adherence to organizational SLA requirements.
- Correlated security events from SIEM, EDR, firewall, proxy, and authentication logs to identify attack patterns and potential security incidents.
- Investigated alerts from firewalls, IDS/IPS, Microsoft 365, cloud environments, and endpoint security tools to determine scope and impact.
- Analyzed Command-and-Control (C2/C&C) communication attempts, suspicious outbound connections, and malicious network traffic using SIEM and threat intelligence sources.
- Performed Root Cause Analysis (RCA) for security incidents and documented findings, timelines, affected assets, and remediation recommendations.
- Utilized MITRE ATT&CK and Cyber Kill Chain frameworks to classify threats, map attacker behavior, and support incident investigations.
- Assisted in creating and tuning SIEM detection rules and use cases to improve threat visibility and reduce false positives.
- Supported proactive threat hunting activities by identifying anomalies, suspicious user behavior, and indicators of compromise across enterprise environments.
- Investigated security events from Linux and Windows systems by analyzing authentication logs, system events, and process activities.
- Generated incident reports, investigation summaries, and executive-ready documentation while maintaining SLA compliance.
- Reviewed and analyzed logs from WAF, firewall, IPS, endpoints, cloud services, and databases to identify security threats and policy violations.
- Followed incident response procedures and security playbooks during malware, phishing, and suspicious login investigations to support containment and remediation efforts.
- Reviewed and correlated logs from multiple security devices and systems to identify abnormal patterns, suspicious behavior, and recurring security events.
- Assisted in SIEM rule tuning and alert optimization activities to improve monitoring efficiency and reduce repetitive false-positive alerts.
- Collaborated with infrastructure, network, and endpoint support teams during remediation activities including account disablement, IP blocking, and endpoint isolation.
- Prepared daily operational reports summarizing security incidents, alert trends, and investigation activities for SOC shift handovers and management review.

- Stayed updated with current cyber threats, attack techniques, and emerging vulnerabilities to improve investigation capabilities and threat awareness.

Education

BTech CSM (AI/ML)
St. Peters Engineering College

Graduation Date: May 2025
Hyderabad

Certification

- **Certified Ethical Hacker**
- **Comptia Security+**
- **Splunk Core Certified User**
